Missing X-axis labels
Posted by vladimir84 - 2016/09/15 11:03

Hello. I created a column chart that shows age distribution:

https://s15.postimg.org/7den6nmif/Capture2.jpg

As you can see, it only shows '2' at the center in the X axis, and no Y axis labels at all. How to fix this?
Below is the SQL code:

```
SELECT
  COUNT (CASE WHEN datipersonali.dp_eta >=0 AND datipersonali.dp_eta =18 AND datipersonali.dp_eta =21 AND datipersonali.dp_eta =31 AND datipersonali.dp_eta =41 AND datipersonali.dp_eta =51 AND datipersonali.dp_eta =61 THEN 1 END) AS '61+'
FROM datipersonali
GROUP BY 'Errore', '18-20', '21-30', '31-40', '41-50', '51-60', '61+'
```

Hello,

Could you save a HTML page with the chart and send it by email?

Regards,
ARI Soft

Set "ARI GChart -> Column chart -> Chart area width" parameter to 90% value.

Regards,
ARI Soft

That is for the Y axis, but the X axis (horizontal) is still showing only one label, the first value of the table.

Column charts show label in X axis. Your chart contains only one label "2" and it is shown.

Found the problem, it was the "revert data" which was set to "Yes"
