
500 Error decoding JSON data: Syntax error

Posted by adolcini - 2017/01/26 10:30

Hi I bought Ari tables and now I'm using it, I set all parameter I wrote a query that I need in the SQL box but when I clicked save I got this error and now I'm not able to open again the modules Ari data tables and all the time that I click on edit I get this error

500 Error decoding JSON data: Syntax error

Call stack

Function Location

```
1 JApplicationCms->execute() index.php:51
2 JApplicationAdministrator->doExecute() cms.php:261
3 JApplicationAdministrator->dispatch() administrator.php:152
4 JComponentHelper::renderComponent() administrator.php:98
5 JComponentHelper::executeComponent() helper.php:380
6 require_once() helper.php:405
7 JControllerLegacy->execute() modules.php:19
8 ModulesController->display() legacy.php:702
9 JControllerLegacy->display() controller.php:79
10 ModulesViewModule->display() legacy.php:664
11 JError::raiseError() view.html.php:42
12 JError::raise() error.php:277
```

Somebody as some ideas ?

Thanks

Andrea

Hello,

Download the latest version of the extension in "Member Area" on our site and upgrade "ARI Data Tables" module on your site.

Regards,

ARI Soft

That's Wonderful and super-fast support !!!

COMPLIMENT !!

Thanks
