
Column width; font size

Posted by andreville - 2017/03/26 21:07

Hello,

I'm trying out Ari Data Tables, and to be honest, the documentation leaves much to be desired.

I'm not able to adjust column width, no matter what I try. Under "ARI Data Table" I have set 'auto width' to 'off', but no matter what setting I try under "Column settings/width" (either px or %), the columns keep reverting to the same size. Very frustrating.

Also, there does not seem to be any obvious way to reduce the font size of the text in the table.

Any help would be appreciated.

Thanks,

=====

Hello,

Could you send screenshot(s) of module settings page and a link to a page with the table by email so we can investigate the problem?

PS: Sorry for the incomplete documentation. Will update it soon.

Regards,
ARI Soft
