
DataTables Error sometime

Posted by blues - 2017/04/28 03:18

Hi

From yesterday morning, each first time, I visit the page with this table will show follow message and cannot display the content. When I logout and re-login, it disappeared and can work correctly.

DataTables warning (table id = 'at_149'): DataTables warning: JSON data from server could not be parsed. This is caused by a JSON formatting error.

Hello,

Is it possible to see the problem anywhere?

Regards,
ARI Soft

It looks like an error occurs on server side so we need to see it to have ability investigate the issue.

Regards,
ARI Soft
