_____

NO jQuery UI theme is applied.

I am on the latest Joomla version. activated the setup in the module everything works, but not the styling. It absolutely does nothing other than my template styles.

Look at this http://ndo-dev.leovanderhoek.nl/index.php/leden/ideal-betalingen

Please help me because if this is not resolved the extension ari datatables is useless.

_____

Hello,

The page is not available, it requires credentials.

PS: Check that "Choose table type -> ARI Data Table -> Use jQuery UI Theme" parameter is enabled and a theme is selected in "jQuery UI Theme" drop-down.

Regards,
ARI Soft

Made the page public, sorry for that.

The theme is smoothness and jQuery UI is activated under ari data tables.

In the head I cannot find anything about jQuery UI theme applied, pls look in the source of the page.

I could add the necessary themes in my template as the last in the header as a custom addition. What package should I refer to?

_____

It seems this is a problem with site template or a 3rd party extension, jQueryUI CSS file is loaded by the extension via Joomla! API (call "addStyleSheet" method of document object), but some reason the file is removed by another extension. We can investigate this problem in more details if you provide a temporary access to your J! backend by email or if you want to include CSS file manually, add the following path:

http://ndo-dev.leovanderhoek.nl/modules/mod_aridatatables/includes/assets/jui/smoothness/style.css

_____

I added that link and now I have styling, although I like to be able to choose another styling. The pagination styling looks bad still.
If you send me an email at webmaster@nederlandse-danssport.org I will add a user with backend credentials and mail the credentials back to you
