## Table freeze after update to Joomla 3.8

Posted by clampi - 2017/09/24 20:10

---

Hi. After updating to Joomla 3.8, the tables "froze". Not possible to scroll or change pages. See for instance this page:  
<http://www.lampi.no/produksjon/teglovner/ringovner>

The table had 13 pages, now only 1 is showing. On the front page, I change the view from 10 to 20 rows, and it suddenly worked. But it looks unstable.

Claes

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Thank you! It works fine.  
I have another site to update too. Is it just to update to v. 1.16.4 to fix the problem?

It is enough to update to v. 1.16.4 and clean Joomla! cache.
