## Ari Image Slider vs Vertex Free template

Hai, i have a problem with the submenu in Vertex Free.

After installing Ari Image Slider 1.6.0 (position = top\_row1\_1) the submenu appears under the slider.

How to get the submenu back on "Top"?

I tried to add following rules in custom.css but they won't work.

```
#rt-top-surround
{
z-index: 1000;
}
```

```
#s5_header_wrap
{
position: relative;
z-index: 1;
}
```

```
#s5_menu_wrap
{
position: relative;
z-index: 1;
}
```

Set "Load jQuery method" parameter to "Local copy" in module settings.
