
index page not response

Posted by sebcom - 2014/04/25 01:32

Hi, I'm using free image slider, the normal operation of a multi-site upgrade from earlier version of Joomla site I do not run 1-2. Index page not open, press stop comes when image loading pages, but they do not come constantly turning image. I have problems with the site address <http://www.barbellabar.com> would be glad if you help me. Thank you in advance ..

Hello,

This problem with site template layout and the selected module position. It uses the fixed width so the slider are not responsive.

Regards,
ARI Soft
