
Loading dot on one page

Posted by rtouillet - 2014/05/07 14:08

Hello,

I have the ARI Image Slider on all my pages, but on my home page I only have the loading dot..

<http://www.fullybeachvolley.ch/site/index.php>

All other pages are OK :)

I have "Include JQuery" set to "Yes" and "Load jQuery method" set to "Local Copy".

Any idea?

Many thanks for your help.

Renaud

Hello,

You use very old version of the extension. Upgrade it to the latest version.

Regards,
ARI Soft

Hello,

Indeed I was in V1.6.8. I installed the v2.1.11 and now it's ok!

Many thanks for your quick reply.
