Put slider below floating menu

Posted by tango91a - 2014/05/08 14:00

_____

Hi,

Thanks for the great slider.

After animation or transition to the next image, the slider always remains above the floating menu. That is when I scroll down the webpage and the floating menu is activated, the slider is on top on the floating menu. I changed the joomla template, but still got the same result.

Any help appreciated.

Regards,
Paul

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

Hi,

The website is currently being developed internally using XAMPP. Will screenshots help?

Thanks,
