Independent settings for a few sliders
Posted by borro - 2014/05/29 16:56

_____

Hello.

Thank you for your slider. Can you tell is it possible to show a few sliders having independent settings for:
1. delay on start slide show,
2. time to show pictures between two fades or random time of sliding in some limits(e.g. from 1 to 10 seconds)
Here is an example which I should repeat with slider. Is it possible with your slider?

_____

It is possible to set unique values for module parameters for each module instance.

Regards,
ARI Soft
