
Cannot link the image on ARI Image Slider

Posted by sajidhayat - 2014/05/31 05:30

Cannot link the image on ARI Image Slider
please tell how i can link images at my site

ini file i create UTF-8 save and link my images and upload images/slider but there is no result

<http://tadabburulquran.com/>

ini file

images/slider/door1.jpg="tadabburulquran.com/images/slider"
images/slider/testpage.jpg="tadabburulquran.com/images/slider"

please tell me where i m wrong :(

INI file should be located in folder with images and use only image names (without path to folder and sub-folders) in INI file.

Regards,
ARI Soft

Your INI file looks like:

```
door1.jpg  
testpage.jpg
```

It doesn't contain links and have an incorrect format. BTW, "images/slider" folder contains door2.jpg image, but doesn't contain door1.jpg.

Use the following content in INI file:

```
door2.jpg="http://tadabburulquran.com/images/slider"  
testpage.jpg="http://tadabburulquran.com/images/slider"
```

Regards,
ARI Soft
