
Problem with the slides navigation

Posted by mercutia - 2014/08/06 22:31

Hi there

My problem are the slides navigation (dots underneath the header, using ARI Image Slider).

I didn't want them so I disabled 'Show slides navigation'. They disappeared but the header turns out weird? I attached a screenshot showing both situations.

Why is that and how can I just remove it without changing the page?

Thanks http://www.ari-soft.com/images/fbfiles/images/with_s_n.png

Hello,

Send a link to a page where we can see the problem. It seems this problem with a 3rd party extension or site template styles.

Regards,
ARI Soft

Thanks for your quick response.

Sorry, I'm not the greatest at Joomla - the website isn't online yet. How can I show it you? Or do you have any other suggestions as to why it displays the header like that?

Good evening!

The website is now online.

On the pages BUCH, REZEPTE & PRODUKTE "show slides navigation" is on. On the page KONTAKT it's off so that you can compare. I don't want it displayed on any page but why does it cut off the module?

Any idea how to fix it?

I tried the template functions, nothing changed.

You can add the following CSS rules to "CSS Styles" parameter in module settings:

```
BODY #slideshow-mod {z-index: 2;}  
BODY #wrap {z-index: 1;}
```
