Image Slider not Sliding after upgrade to Joomla 3

Posted by jjbongio - 2014/10/20 23:40

_____

Look at test.cal-sailing.org

It shows one image, and that's it. It does not show the navigation arrows. I did didable loading jquery, which fixed a problem where the submenu items dropped behind the slideshow.

TIA.

Hello,

It is not possible to open the link.

Regards,
ARI Soft

_____

It seems this is a javascript conflict (for example several instances of jQuery library are loaded on the page). Could you provide a temporary access to your J! backend by email so we can investigate the problem?

I have setup an account for you and sent the credentials to info@ari-soft.com.

Thanks for looking into this.

_____

This is a problem with site template which you use. It removes javascript code which is added by the module via Joomla! API. The module works fine when another template is used (for example "Atomic" template). You can contact site template developers so they fix this problem.

Regards,

ARI Soft

Thanks so much for looking into this. This is one of several problems with the template.
