w3c validation issues

Posted by dsalchow - 2015/01/05 11:50

Hi,

First of all. Happy new Year.

I got the following issues during the validation

Validation Output: 3 Errors

Error Line 115, Column 46: Bad value 0 for attribute rel on element a: The string 0 is not a registered keyword.

Syntax of list of link-type keywords:
A whitespace-separated list of link types, with no duplicate keywords in the list. Each link type must be listed as allowed on and in the HTML specification, or must be listed as allowed on and on the Microformats wiki, or must be an absolute URL. You can register link types on the Microformats wiki yourself.

Error Line 121, Column 39: Bad value 1 for attribute rel on element a: The string 1 is not a registered keyword.

Syntax of list of link-type keywords:
A whitespace-separated list of link types, with no duplicate keywords in the list. Each link type must be listed as allowed on and in the HTML specification, or must be listed as allowed on and on the Microformats wiki, or must be an absolute URL. You can register link types on the Microformats wiki yourself.

Error Line 127, Column 39: Bad value 2 for attribute rel on element a: The string 2 is not a registered keyword.

Syntax of list of link-type keywords:
A whitespace-separated list of link types, with no duplicate keywords in the list. Each link type must be listed as allowed on and in the HTML specification, or must be listed as allowed on and on the Microformats wiki, or must be an absolute URL. You can register link types on the Microformats wiki yourself.

Can some help me ?

Thank you very much in advance.

Best regards,

Dirk

Hello,

These validation messages are not affected on extensions functionality. BTW these warnings are shown only if validate document as "HTML5" document.

Regards,
ARI Soft
