
empty slide after corret view of all image

Posted by fiorenzi - 2015/01/08 14:14

Hi, I am new

I have installed on last joomla 3.3.6 ARI Image Slide module version 2.1.11.

in my lab all works fine, after I put it on production, I have get a cosmetic effect: after the sliding of all picture (dimensioned 920*250) get a blank one of dimension 0 and then restart from the first image. it is on

<http://www.alessandrofiorenzi.it>

what could be the problem? any one have experienced this?

Thanks

Alessandro

Hello,

Try to temporary disable "pagespeed" extension and clean Joomla! and browser's cache.

Regards,
ARI Soft

You are right!!! Disabling modepagespeed module it works fine.

Thanks
