
No images in slider

Posted by Keith Klirkendall - 2015/02/26 14:27

I have the slider on the same page as my Ari Data table.

In firebug I can see that the images are being found but aren't displaying in the slider. In the firebug console there is this error. <http://www.ari-soft.com/images/fbfiles/images/error-03406ef74fdae63130fb855a9bc38e3d.jpg>

Hello,

It seems jQuery library is not loaded on the page. Set "Include jQuery" parameter to "Yes" and "Load jQuery method" parameter to "Local copy" value in module settings. If it doesn't help then check that a 3rd party extension or site template don't remove jQuery library.

Regards,
ARI Soft

Your suggestion worked great and the slides look great now. But now the main menu is going behind the images :(

You can contact developers of menu extension or we can investigate the problem if you send a link to a page where the problem occurs.

Add the following CSS rule to a site template CSS file and clean browser's cache:

```
#ja-topsl {position:relative;z-index:1;}
```

Regards,
ARI Soft
