
Slider installed succesful but no images shown.

Posted by inguarkp - 2015/03/10 08:47

Hi! just installed ARI slider but can't get it to show the images.

I see the module position shows a blank panel where the images should load, but no images. :S
Here is my testsite :

<http://109.73.175.226/~groupsms/index.php/valokuvia>

Best regards
inguarkp

Hello,

Set "Load jQuery method" parameter to "Local copy" value in module settings.

Regards,
ARI Soft

Now it's working properly! :cheer:
Many thanks!!!
Best regards
