Hi, Tabs missing after joomla update to 3.4.0 in Ari Image Slider (mod\_ariimageslider)

Only module tab, no tab for select page or any other tab.

Any idea why?

tnx Arthur

Hello,

Check that you use the latest version of the extension (it can be downloaded [here](#)).

Cheers,

I got an similar problem like arthurk. I have tried to install the latest Module mod\_ariimageslider on a brand-new Joomla 3.4 Installation.

I see a few Tabs now, but am missing the options-Tab where i could set Image Path, Transition Effect etc.

Thanks for your help

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Hi,

I had the same issue, missing tabs. After upgrading to the latest ARI Image Slider everything is working again.

Thanks,
