## Slider do not load images

Posted by sapo - 2015/03/31 10:45

---

Please have a look on my test-site:

<http://jos.zahnd.info>

Ari images slider was already installed and was working most of time good, some undefined "no loading errors" was happen already there.

Now, i installed ari pretty photo (3 plugins and 1 modul) and changed the Lightbox integration to ari pretty photo.

Now slider do not work anymore, also way back not working. I tried a lot of settings, no way to bring it back.

Thanks for helping

Hello,

Set "Include jQuery" parameter to "No" in module/plugin settings.

Regards,  
ARI Soft

Thanks looks much better now.

start site works fine, popup looks nice<http://jos.zahnd.info/index.php>

but when go to next menu entry:

<http://jos.zahnd.info/index.php/foto-alben/landschaften>

popup is not working anymore.

I have only one single slider defined.

Thanks for helping

found it

changed on plugin ARI Pretty Photo load method to on load.

Great, I'm very happy now, very nice extension. Thanks al lot
