
Not able to see title for pictures

Posted by jcsendra - 2015/04/08 14:14

Hi,
I'm using your Ari Image Slide and I have configured my .ini file with the following:

```
america.jpg="Waldo"  
angel.jpg="Xona"  
antorcha.jpg="Pau"
```

```
america.jpg="http://www.albardins.com/images/albardins_tot/america.jpg"  
angel.jpg="http://www.albardins.com/images/albardins_tot/angel.jpg"
```

```
america.jpg="Waldo"  
angel.jpg="Xona"
```

But neither the title nor the alt text appear when the images are show in the page

in addition, only one picture appears at a time. Would it be possible to display more than one at any single moment?

My page is www.albardins.com

Thanks

=====

Hello,

We don't see "ARI Image Slider" module on the page. It contains only "ARI Cloud Carousel" module.

Regards,
ARI Soft

Sorry,

I have change it (I'm making many attemps with different tools)

I'll come back to the module in a minut

INI file should be located in folder with images. /images/albardins_tot/ariimageslider.ini file doesn't exist.

It works. What about displaying many pictures at a time? Is it possible?

The slider can show only one image at time.
