## Slider stopped working please help

Posted by sudie97 - 2015/06/22 16:45

---

The slider has stopped rotating. The only thing i've done is update Joomla. I am currently on joomla 3.4.1, i auto updated it so not sure from what version, definitely 3.3x or 3.4.

Any help would be greatly appreciated. Thanks!

Hello,

Send a link to a page where the problem occurs.

This is a problem with javascript code which is loaded from cmc-td.com site. It generates javascript errors (you can see it in browser's error console) and affect on "ARI Slider" functionality.

Huh? :)

Ok, what is cmc-td.com? Can you point me in the direction of how to fix this?

Thanks,  
Susan

---

Open HTML of home page on your site and you will see it contains the following code:

---

The loaded javascript code from cmc-td.com causes problems.
