
Can't install Image slider to Joomla 3.43

Posted by artemis2007 - 2015/07/26 23:45

I unzipped the files on my computer and have attempted to install each of the three xml files. Each time I get the message:

Error

Unable to find install package

This is a new installation of Joomla 3.43. I have been able to install other extensions. Thanks for any help.

Hello,

Specify path to a folder with unzipped extension. Joomla! installer finds an appropriate manifest file automatically.

Regards,
ARI Soft

For some reason, that didn't work the first time, but now it does. Simple- thanks!
