
start slideshow on load?

Posted by sdfsgdfdsdfsgdsf - 2015/09/02 08:35

How do I configure the slideshow to start on page load?

Hello,

Set "Load method" parameter in module settings to "On Load" value.

it is set to 'onload'. The slideshow is displayed properly, and navigation with the arrows works fine, but its not automatically playing.

Maybe I misunderstood something. Maybe this extension is not for displaying an image every few seconds, but only changes image via navigation?

Set "Manual advance" parameter to "No".
