## menu shows behind imageslide

Posted by ozza - 2015/11/07 00:37

---

Hi,  
The menu disappears behind the images

I have set the images other z-index (found at forum)

```
body ul.menu-suckerfish ul
```

```
{  
z-index: 1000;
```

```
}
```

But as soon as the second image shows, menu goes behind image.

<http://www.futuracollege.nl/>

Menu is at "algemeen"

cheers Mike

Sorry,

```
{ $id }
```

```
{
```

```
z-index: 1;
```

```
}
```

resolves everything
