Cannot link to a Joomla article

Posted by Jeff Johnson - 2010/07/25 06:14

_____

Nice module...but, I cannot link to a Joomla article with the ini file unless the Joomla URL is in a user-friendly format. The site I want to use it on does not have sh404SEF installed.

Any help would be appreciated.

Jeff

_____

Hello,

Could you specify this problem in more details? For example, if you want to create link to article with ID = 27 for image with file name "image_01.jpg", use the following INI file:

image_01.jpg=Test image

image_01.jpg="index.php?option=com_content&view=article&id=27"

In other words, quote a link with " symbols. It's INI file format requirements.

Regards,
ARI Soft

Thanks. That worked great.
This slider was just what I needed.
Works great!
Keep up the good work!
