
Ari Image Slider not loading images

Posted by jobepro88 - 2016/10/12 18:55

Hi I installed the newest update and just have navaigation circles no images.

www.visionarmusicgroup.com

I tried changing all parameters and I am stuck at how to resolve the issue.

Thanks,
Joe

Hello,

The site is not available. Check it please.

Regards,

The slider doesn't contain images. Could you send screenshot(s) of module settings page by email or a temporary access to your J! backend so we can check module settings?

Regards,
ARI Soft

It is a problem with 3rd party extension. The module generates correct output with images, but on the page the images are absent, it seems they are remove by 3rd party extension.
