No Description shown in IE

Posted by derwydd - 2010/08/31 23:38

_____

Hello, I installed this module for joomla 1.5. It works perfectly in Firefox and Chrome,but not in Internet Explorer. In Internet Explorer it does not Display any Description. Is this a browser issue?

Edit: it seems to be a theme issue, maybe a script that my theme is using?

Any Ideas?

_____

Hello,

Provide link to page, please, where we can see this issue that we can find the reason of the problem. We suppose it's conflict with site template or 3rd party extension styles.

Regards,
ARI Soft
