
problems with transparency in images

Posted by bonna - 2010/10/14 07:40

Hi,

This slider has all the features I need but does not quite seem to handle images with transparency very well.

I use images with transparent areas and when they are rotated then the previous image keeps shining through the current image, which is not good. So my question is, is there a way to prevent that?

Thanks!

Franklin

Hello,

Unfortunately current version doesn't provide this ability.

Regards,
ARI Soft
