What is going on here?

Posted by jodaki84 - 2012/08/16 22:48

_____

I have purged the cache a half dozen times and made sure the directory says writable and everything else I can think of so far. It just will not work even though it works on every other page I put it on.

_____

Hello,

It seems this is a problem with SmartLoad feature provided by your site template. Disable it or configure it properly.

Regards,
ARI Soft
