
ARI Cloud / Modules Anywhere / Flexicontent Issue

Posted by smallbiz - 2012/08/23 03:28

I'm using FlexiContent, with an Item (Article) using the directive {module ###} from Modules Anywhere plugin, to render ARI Cloud Carousel onto a page -- it was working in an earlier version of FlexiContent, but isn't rendering in FLEXIcontent v2.0.0 r1420

URL to the ARI Carousel is :

http://www.marketaccess.ca/index.php?option=com_flexicontent&view=item&id=11

Any ideas why it stopped working? I'm running latest ARI Cloud Module.

Hello,

This problem with "Modules Anywhere" plugin. We have sent the solution by email.

Regards,
ARI Soft
