
Offset container position

Posted by Didier - 2012/08/31 15:54

Thanks for this excellent module and all interessant topics and responses in the forum, which helped me a lot installing ARI Cloud Carousel.

The last hint so far: as you can see from screen capture attached, the module container appears to the right of the page and I would like it centered or aligned to the left. I tried different settings for X-pos but then the leftern image disappears. The module is inserted in the article with help of plug in "Content - Load Module in Article".

Any idea ?

Thanks

Hello,

Provide a link to a page where we can see the carousel on your site so we can investigate the problem.

Regards,
ARI Soft

Here it is (this site is not finished and we are testing the carousel before making this choice and buying the Sexy Light box).

What browser do you use? It looks in FireFox for us:
