## change opacity or fade back images not in front

Posted by mindymccain - 2012/09/28 21:36

---

Is there a way to style the images that are not at the front? I want to change the opacity, or fade back all the images except the one at the front of the carousel.

Please let me know. And thanks!

Hello,

Use the following CSS rules:

```
.ari-cloud-carousel IMG
{
  opacity: 0.5;
}

.ari-cloud-carousel IMG.active
{
  opacity: 1;
}
```

Regards,  
ARI Soft

Fantastic! Including the CSS on the module options page is a wonderful feature.  
Thank you so much.
