## Can't include Ari Cloud Carousel in Joomla Article

Posted by CaterinaC069 - 2012/10/02 07:59

---

Dear All, perhaps there is a thread somewhere in the forum, but I didn't find it! I'm trying to enclose the ari cloud carousel module with sexy lightbox integration in an article.

I installed the 2.5 joomla platform; the cloud carousel worked perfectly on the previous 1.5 platform, now with the same syntax it doesn't work.

Specifically, I call the module with this syntax:

```
{aricloudcarousel moduleId="93"}
```

where 93 is my module Id. I didn't attribute any module position to it, anyway, it worked perfectly the same with previous version!

Please, help me...thanks a lot!

Hello,

What is {aricloudcarousel moduleId="MODULE\_ID"} ? If you want to load "ARI Cloud Carousel" into an article use "Content - Load Module" standard Joomla! plugin or "Module Plant" plugin or "Modules Anywhere" plugin. More information can be found [here](#).

Regards,

The instruction of using this line was given by you! In a past mail, while I was working on joomla 1.5, and worked perfectly. I tried also the method of loadmodule, but it doesn't work...I always received a php error or line 113 of class.CloudCarousel.php...

thank you for your kind help!

Described methods work fine on our server and they work fine for a lot of customers.

Where we can see the problem? Send also a temporary access to your J! backend by email so we can investigate the problem.
