
Images Working but not Showing

Posted by Banana - 2012/10/25 18:14

Hello,

I installed everything as described. But i cant see the images in the carousel. However, i can see them when i press on them.

Hello,

Set writable permissions for /cache/ folder, clean Joomla! cache and reload the page.

Regards,
ARI Soft

Thank you very much for your answer. However, unfortunately I'm new to Joomla. Could you please tell me where do i need to do that?

Thank you

You can change folder permissions by FTP or use eXtplorer Joomla! extension. Open "Site -> Maintenance -> Clear cache" page on Joomla! backend to clear Joomla! cache.

Hmm, so writable permissions was already set for user on all pictures in cache.

Clear Cache was empty, however i did Purge Expired Cache.

Nothing changed. :unsure:

Could you provide a temporary access to your J! backend by email?

Regards,
ARI Soft

Hi

I am new to Joomla, but have finally managed to install the Cloud Carousel on Joomla3.0.3. The Carousel is working, the HTML code is there but i don't have any images showing on my page. Looks like I may have the same problem. Could you please reply with what I need to do to my htaccess.txt file.

Thanks for your help, and allowing the Cloud Carousel to be downloaded for free. :)

Thanks
Chris
