
Bug. Cannot save CSS Styles. Conflict.

Posted by illovo - 2012/11/21 19:24

Hello,
while testing carousel module in Joomla 3.0.2 I tried to enter my own CSS Styles in textarea. When I saved it the textarea was filled with a "0".

Reason is a conflict with already existing form field named "jform" for selecting the module style.

Test:
Create new Module Ari-cloud-carousel.
Goto Advanced Options.
Change Module Style to "html5".
Save module.
Goto Basic Options.
Check content of textarea CSS Styles. It's "System-html5" now.

See HTML Source code. Double "jform".

CSS Styles

System-html5

Module Style

...

none
html5

...

Hello,

Thank you for your notification. We have fixed the problem and new version of the module can be downloaded [here](#).

Regards,
ARI Soft
