Images not shown when i click on them in carousel
Posted by avfenix - 2012/12/23 18:49
_____

Hi!
I have used the module in another article and it works fine. In this article in particular when i click in the thumbnail the image does not open. I've duplicated the module, so every setting is like the one that it's working except for the images, even though I've changed the image path.
Can you help me? :S

This is the article that is not working.

Hello,

It seems this problem with name of images. It seems they contain some specific character(s). Try to remove or replace them.

Regards,
ARI Soft

Thank you so much!!!
It's working now :)
