
Large Whitespace between AAC and content in articl

Posted by Waddy - 2012/12/31 06:29

Hello,

Thank you for a great extension. I have one problem I cannot seem to get around.

I have loaded ACC using loadposition under text in an article.

The problem is there is a large gap/whitespace between article text and ACC?

*EDIT:

FIXED: It was just a matter of playing with y pos and y radius

Awesome!
