## page links - what is itemID?

Posted by MikeWelsh - 2013/01/17 11:49

---

Hi

I am trying to sort a previous installation using carousel.

In this page link I can find the article from its ID number, but what is the item ID here:  
option=com\_content&view=article&id=89&Itemid=59

Many thanks, Mike.

Hello,

"Itemid" is used by Joomla! to detect active menu item.

Regards,  
ARI Soft
