Save INI file in UTF-8 encoding. If it doesn't help, provide a link to a page where we can see the problem and send screenshot(s) of module settings page by email.

"Description file" parameter should contain only file name, not path to folder or sub-folders and description file should be located in folder with images. For example set "Description file" parameter to aricloudcarousel.ini and copy your file to folder with images. The file should have aricloudcarousel.ini name.
