
Font Color INI

Posted by andrej - 2013/03/14 17:05

Hello

I wanted to change the color and font displayed in the ARI Cloud Carousel from the INI file. How to do it?

Regards

Andrzej

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
DIV.nivo-caption-content
{
  color: red;
  font-size: 20px;
  font-family: Tahoma;
}
```

Regards,

ARI Soft

Welcome.

Unfortunately not working.

Frames are, the word has been no change;-)

I added the "CSS Styles" parameter in module settings:

```
IMG.cloudcarousel
{
  border: 1px solid maroon;
}
#sbox-content IMG
{
  border: 3px solid maroon;
  margin-top: -3px;
  margin-left: -3px;
}
DIV.nivo-caption-content
{
  color: red;
  font-size: 20px;
  font-family: Tahoma;
}
```

You can see it on the page:

Sorry, the previous solution was for "ARI Image Slider" module. Use the following CSS rules for "ARI Cloud Carousel" module:

```
DIV.ari-cloud-carousel-title
{
font-size: 26px;
color: red;
font-family: Tahoma;
}
```

```
DIV.ari-cloud-carousel-alt
{
font-size: 18px;
color: green;
font-family: Tahoma;
}
```

Regards,
ARI Soft

Thank you.
That's it

Andrzej :woohoo:
