Not woking on live site

Posted by carbar - 2013/05/28 07:00

_____

Hi,

I had tested the Carousel on my PC's localhost before putting it on my live website here: 1host2u
Unfortunately, the images are not showing and I'm not sure why!!!

Any idea what may be the cause?

Thanks :unsure:

_____

Hello,

It seems /cache/ folder doesn't have writable permissions.

Regards,
ARI Soft

_____

Yes, you are right!
I changed the permission to 775 and it's working now :woohoo: , not sure if it's safe though :unsure:
