
Images not displaying

Posted by jorgensen - 2013/09/03 20:48

Just got the extension and set it up - I think correctly, but obviously not. It isn't finding my images. The homepage is lakechapalareporter.com, and I've attached a screen shot of my settings. Can you assist? <http://www.ari-soft.com/images/fbfiles/images/Settings-abf5724f033277865becad56efed25c0.jpg>

Hello,

Send a link to a page where you try to use the module and screenshot of common module settings parameters (where we can see module position and "Menu assignment" parameters).

Regards,
ARI Soft

OK. The page is lakechapalareporter.com. The images should be showing in the lower right hand area that says Meet the Expats! You can see the circular searching for images. It's assigned to the Home page only, as shown on the attached image. http://www.ari-soft.com/images/fbfiles/images/Menu_assignment.png

Set "Load jQuery method" parameter in module settings to "Local copy" value.

Regards,
ARI Soft
