Menu Problem When Carousel Published

Posted by jorgensen - 2013/09/05 15:20

_____

On frontpage www.LakeChapalaReporter.com, when the carousel (lower right hand corner) is "Published," the bottom menu has trouble displaying its sub-menu items. The submenu items display perfectly when the carousel is 'Unpublished."

Any ideas on how to fix this?

_____

It seems to be happening using Firefox pretty consistently, but not IE. Are there any settings I can tweak?

Hello,

What IE version do you use? It is shown fine in IE 10.

_____

What FireFox version do you use? In version 23.0.1 the menu looks normal:

Thanks so much! That was the problem. I was on 14.0.1. I upgraded to 23.0.1 now, and it works just fine!
