Titles in the modal window
Posted by xoco - 2013/09/11 00:29
_____

Hi,

I'm trying to put a title to each picture, with the .ini file.
It works, but it appears in the top of the carousel.
I would like to delete this line and to put the title in the modal window is it possible???
Tx in advance!

Hello,

Add the following code to "CSS Styles" parameter in module settings to hide titles and descriptions:

{$id}_wrapper .ari-cloud-carousel-caption
{
 display: none;
}

Regards,
ARI Soft

Ok, the title disappears from the carousel, but it doesn't show in the modal window.
Besides, the whitespace in the top of the carousel doesn't disapear.
How can I do?

_____

Container for titles and descriptions uses "position:absolute" CSS property and it doesn't add additional space to main container.

What lightbox extension do you use? Have you specified titles for lightbox in section in INI file?

Regards,
ARI Soft

ok it works now ! I change to in my ini file.
I use Ari Sexy Light Box !
Tx for all !
