Error Image/Asido/class.image.php on line 283

Posted by pixelschupser - 2014/06/09 06:50

_____

Hello Support
I have the error message above on ari cloud carousel. Here comes the original error message:
Warning: Failed to save the result of the image operations in
/www/htdocs/w00fe6a3/pixelschupser/modules/mod_aricloudcarousel/mod_aricloudcarousel/kernel/Image/Asido/class.im
age.php on line 283

First I have done the test on my mac at home here it run's without any problems. Now for round one week I have done
the copy to the official sight in the Internet. Today I want to have a look to the sight. I want to take a lot of newer smaller
pictures in my carousel. and then I run into the error which I have described above. The cache directory was changes as
first step from 755 to the permission of 777.

I hope you can help me. I have also written a Email to yourside with the user account and passwort to login to my official
side.
"www.pixelschupser.com"

kind regards
Hansjörg Lauble
