
Title and description placement

Posted by ybelkin - 2014/11/24 07:51

Hello

Is there any way to change position of title and description of the image?

To place it:

- under the image

or

- close to mouse pointer, so it could move with the pointer

?

Thank you

Best regards,

Yaroslav

Hello,

It requires a custom modification of the extension.

Regards,

ARI Soft
