
Not Working under 3.4

Posted by c.brandenburg - 2015/03/20 11:17

Hi,

i have installed the actuall version of cloudcaroussel, but I cant see it working, tried to change the jquery method to local but wihtout success

Hello,

We see only "500 - JHtmlBehavior::mootools not found." error message when try to open the page:

Set "Load jQuery Method" parameter to "Local copy" value and remove including of jQuery library from site template (it loads old version of jQuery 1.4.3 and causes conflict with jQuery instance which is loaded by Joomla!).

Regards,
ARI Soft
