
System - ARI Sexy Lightbox\" plugin isn't installed

Posted by carosouza - 2010/08/02 16:20

Hello, I saw the module aricloudcarousel in JED and I am testing on localhost, it says:

ARI Cloud Carousel: "System - ARI Sexy Lightbox" plugin isn't installed. I've been here plg_content_arisexylightboxlite is the same? Thanks and more great length, good business.

Hello,

Yes, in 'ARI Cloud Carousel' description you can find that it works with ARI Sexy Lightbox not with ARI Sexy Lightbox Lite. If you are interested in integration with free lightbox plugins, the module supports core Joomla! lightbox and Ninja Shadowbox plugin.

Regards,
ARI Soft
