
Problem with ARI Slick Gallery

Posted by Sevcik - 2011/09/02 05:15

Hello,

I have a problem with this extension. When I enable this module my website doesn't show anything.

My websites: <http://www.bb9.bb9.cz/>

Joomla 1.7

Template: Joomlart Anion

Could you help me please. Thank you.

Hello,

It seems a PHP error occurs. It can be a conflict with a 3rd party extension. Check web server error log please.

PS: We can investigate the issue in more details if you provide temporary access to your J! backend by email.

Regards,
ARI Soft
